BERKELEY

Berkeley, California, Jan.12, 1923.

Dr. Philip A. Munz,
Pomona College,
Claremont, California.

Dear Dr. Munz:-

It is, at this time, impossible for me to go back and work critically on Liliaceae, but I have taken the time to examine microscopically the glandular hairs on your Calochortus no. 4838 and I feel certain that it is C. flexuosus Wats. When I studied this species for the Flora of California I borrowed sheets from the National Herbarium. We had not and have not a single sheet, so I am thankful to have this collection of yours. If you obtain the opportunity, pray collect a lot of it!

Yours sincerely,

W. L. Jepson

W. L. JEPSON.
